

Soil Remedy Universal 4.3.3. is a well-known 100% organic Fertilizer pellet, ecologic and hygienic. In addition to the major nutrients such as Nitrogen, Phosphorus and Potassium (NPK) **Soil Remedy Universal 4.3.3.** contains a high percentage of organic material, aswell as important trace elements such as Fe, Mn, B, Mo, Zn and Cu.

The organic material in this excellent, natural plant Fertilizer contains mostly humic acid structures, humic acids benefit soils in facilitating its nutrient availability, they release gradually the minerals present in the ground and therefore, minerals become more available for absorption by the roots of plants.

correct application of **Soil Remedy Universal 4.3.3.** prevents symptoms of deficiency in the crops during growing season. This positive effect of **Soil Remedy 4.3.3.** means a considerable saving in mineral Fertilizers, and a reduction of mineral Fertilizers application in the soil, is good for the environment and help preventing soil alkalisation.

APPEARANCE

Pellets of 4-5 mm, can be applied easily by spreader or by hand.

RAW MATERIAL

100% Chicken manure.

APPLICATION

1 à 3 tons/ha. Frequency depends on soil and culture.

BENEFITS OF PRODUCT

- Pasteurization according to European standard 1069/2009
- Sterilisation by means of the patent pending ETEKIN™ ThermoVac™ technology.
- Homogeneous and stable thanks to very modern drying technology.
- Traceability thanks to controlled production.
- Stimulates activity of micro-organisms in soil.
- Natural oligo-elements present: Fe, Mn, B, Mo, Zn, Cu.
- Sustainable and ecological product.
- Non-acidifying source of humus.
- No leaching.
- Increased, healthier production.
- Stabilization of soil structure.
- Regularization of water and air in soil.

AREAS OF APPLICATION

- Vegetable cultivation
- Fruit cultivation
- Viniculture
- Tree cultivation
